This exclusive residential complex consists of two and three-bedroom apartments and penthouses, designed to offer a comfortable, bright, and balanced living experience. Each home has been crafted to create welcoming spaces where natural light and outdoor connection take centre stage. The private terraces and gardens extend the living space, becoming the ideal place to relax, share special moments, or simply enjoy the surroundings. More than just a place to live, this residence promises a lifestyle designed for enjoying the everyday to the fullest.

One of the standout features of the project is its carefully considered orientation. Most homes have dual east and southwest orientation, with two opposing terraces, allowing sunlight from dawn / dusk
